STILES "The Druggist"

shovel 30 years ago.

Ten years ago an automatic machine for the making of electric light bulbs was invented which produced 73,000 in 24 hours—formerly one man could make 75 in a day. Recent improvements so increase this productivity that each machine replace:

The strip mining of coal has pr duced a power shovel that lifts a ton at a time, dumps it in oass and re-turns for a second bite in three-quarters of a minute.

One girl with a rib cutting (cloth-ng) machine does the work of 25

The lasting machine enables one can to do the work of 10 shoemakers. Machines now do 90 per cent of ne work of making a shoe.

The carton machine does the work from hand wrappers.

A pig casting machine with sever operators took the place of 60 work

With a cigar making machine one man does the work of 15.

Two men do the work of eight helped by an automatic stoker.

An automatic butter wrapper and card printing machine will wrap in quanter portions and put cartons on more than six tons of butter in eight hours.

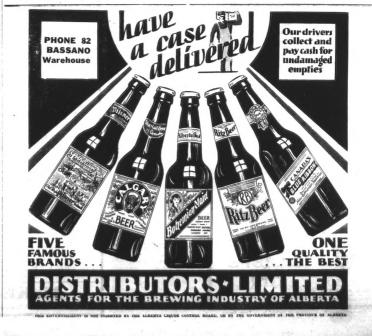

hours.

The dial telephone reduces the operating force to one-third.

It is estimated that under old hand methods it would require one million men to make ten thousand Ford cars in the time now required.

rord cars in the time now required, and they would cost \$10,000 each.

While this by no means completes the list of labor saving machinery, it will give a fair idea of the trend of modern industry, agriculture, and
